

New COPIC ERS point approved for participation in QHN

After negotiating on behalf of QHN with COPIC since last May, approval of an ERS point will be awarded for physicians participating in the regional health information, quality improvement network, Quality Health Network (QHN).

Our thanks to Dr. David West who wrote a letter to COPIC asking them to support this idea. Live demonstrations were provided to key personnel at COPIC as well as many discussions.

This point will be awarded to any COPIC insured physician who participates in a health information network within the state of Colorado.
